- ▶ NYC to become a leader in *smart city* infrastructure
- ▶ One piece: Evaluate autonomous vehicles
- ▶ By 2020, NYC expects its fleet to be autonomous.
- ▶ We will evaluate AutoMerge (AM) Inc as an alternative.

Alternatives

1. Do not not implement AM.
This are the costs that would be incurred if the status quo continues so there is little uncertainty for this alternative.
2. Implement AM.
Implementing AM comes with uncertainty with respect to AM performance.
3. Perform a pilot study.
We decide size of pilot study. A larger the study reduces more uncertainty than a smaller one but costs more.

Results

Sensitivity

References

We account for uncertainty using decision trees. Our sources of uncertainty are weather and performance of AM.
